1. The home offices of the Construction and Repair Firm of the paper industry are located in Krappowice (Krappitz) (N 50-29, E 17-58), Poland. This company employs approximately 600 workers. Of this number, approximately 400 are Germans. This firm sends out teams to various plants, mainly paper mills, to do repair work and/or mechanical and electrical assembly work.
2. The Klucze paper mill is located in Klucze (N 50-20, E 19-34), a small town hidden in the woods, about 50 kilometers west of Cracow. The mill employs approximately 2,000 workmen. It is presently being repaired and enlarged. First grade white cellulose, white paper and wood alcohol are manufactured there. Practically the entire production of the Klucze paper mill is exported to Russia.
3. The main Glucholazka paper mill is located about 200 meters south of the town of Glucholazy (N 50-19, E 17-22). It is an old factory with old machinery. Approximately 500 workmen are employed. Good white cellulose and white paper is manufactured. The products are not exported but rather supply the town of Rudawa (N 50-56, E 17-18). This is a small old factory, employing approximately 200 workmen and producing second grade paper to be used for paper bags.
4. The Myszkowskie paper mill is located approximately 400 meters west of the town of Myszkow (N 50-35, E 19-21). It employs about 2,000 workmen. The factory and its machinery are both old. A [ ] word grinding machine has just recently been installed. This mill manufactures a good grade of white cellulose and colored paper. It is said that a machine at this plant produces 16 tons of nothing else but black-out paper per day.
5. All the above-mentioned factories operate on a 24-hour day basis, employing 3 eight-hour shifts. Most of the machinery in these plants was manufactured either in Austria, East Germany or Poland. The Polish-made machines came from Bielsk and Lodz.
